OAK SOE THEIN

Junior Full-Stack Developer

Bangkok, Thailand | 0829295713 | oaksoe.thein01@gmail.com

Portfolio: oaksoethein-dev.vercel.app | GitHub: github.com/tom2811 | LinkedIn: linkedin.com/in/oak-soe-thein

SUMMARY

Early-career full-stack developer currently pursuing a Higher Diploma in Infocomm Technology (TMC Academy, Singapore) while building hands-on experience across React, Next.js, and backend tooling including Node.js, Express, and Django through personal projects. Six months of professional on-site experience as a frontend developer migrating a legacy .NET Core application to a modern React frontend, plus project experience building AI-integrated web applications with React, Django, and TypeScript. Seeking Junior Full-Stack Developer, Frontend Developer, or React Developer roles in Thailand or international remote teams.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, HTML, CSS

Frontend: React, Next.js, Tailwind CSS, Quill.js, React Flow

Backend (personal projects): Node.js, Express, Django

Tools & Platforms: Git, GitHub, Vercel, Postman

AI/Automation (project experience): LangChain, LangGraph, Selenium, BeautifulSoup

EXPERIENCE

Frontend Developer — Sunfix Consulting Oct 2025 – May 2026

On-site — Sanchaung, Yangon, Myanmar

- Worked on migrating an internal business operations platform from a .NET Core full-stack application to a React-based frontend.
- Rebuilt existing .NET Core views as component-based React interfaces as part of an in-progress frontend modernization effort.
- Role concluded mid-migration following relocation to Bangkok, Thailand.

PROJECTS & HACKATHONS

NoteSpace — AI-Powered Note-Taking Platform Apr 2025

One Project One Week Hackathon, Technortal

- Contributed to an AI-powered note-taking web app that converts PDFs into structured notes and visualizes content with interactive knowledge graphs, built with React and Django.
- Translated Figma designs into a responsive frontend using React and Tailwind CSS.
- Built the primary note-taking editor using Quill.js and the user-facing chatbot feature, integrating it with the AI backend.
- Implemented content summarization by connecting the frontend to the AI service (LangChain/LangGraph).

Donatio — Charitable Giving & Donation Platform 2025

One Project One Month

- Built the frontend for a full-stack charity and donation platform using Next.js, TypeScript, and Tailwind CSS.
- Used TanStack Query and Zustand for data fetching and state management, with ShadCN for UI components.

Code2Career Hackathon — ERP System Feb 2025

JICA Myanmar

- Built the frontend for an admin dashboard as part of an ERP system digitalizing a local IT company's operations.
- Designed the UI for HR, Finance, and Sales modules, and interfaces for Inventory, Warehouse, and Delivery tracking.

Community Contributor — Burmese AI Community 2024

- Worked on web scraping and automation projects using Python, Selenium, and BeautifulSoup to extract and analyze data from various websites.

EDUCATION

Higher Diploma in Infocomm Technology Mar 2026 – May 2027 (Expected)

TMC Academy (Singapore), delivered via British United College (BUC), Yangon, Myanmar

Planning to progress to a Bachelor's degree upon completion.

Coursework in Electrical Power Engineering 2017 – 2020

Government Technical Institute (Insein), Yangon, Myanmar

Studies postponed due to COVID-19.
